**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims a non-aqueous electrolyte comprising: a cyclic carbonate; a lithium salt; and a polyether-modified silicon oil represented by formula 1 in which a polyether chain is bonded to a terminal end of a linear polysiloxane chain, the polyether-modified silicon oil having a viscosity of less than 10cSt at 25°C: Formula (1) where k is an integer from 0 to 10; m is a natural number from 2 to 4; n is a natural number from 1 to 4; R1 to R7 are independently or identically, selected from hydrogen or C1 to C5 alkyls; and Z is CH<sub>3</sub> or C<sub>2</sub>H<sub>5</sub>.

Applicant claims a rechargeable lithium battery comprising the above described electrolyte.

The Applicant claims an electrolyte for a rechargeable lithium battery comprising: a polyether-modified silicon oil having a viscosity of less than 10CSt at 25 degrees C, a cyclic carbonate, and a lithium salt, wherein the polyether-modified silicon oil includes end silicons, wherein each end Si atom includes a terminal bond to a polyether group.

In the prior art of record, Horie, JP 2003-142157, teach a nonaqueous electrolyte comprising a cyclic carbonate, a lithium salt, and a polyether modified silicon oil; having a viscosity of 5000cSt at 25 degrees C.

However, the prior art of record, taken either alone or in combination, fails to disclose or render obvious the polyether modified silicon oil having a viscosity of less than 10cSt at 25 degrees C, "thereby preventing fading of lithium ion conductivity".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
